1 PUBLIC ENGAGEMENT AND COMMENTS FROM I&APS

1.1 INTRODUCTION

Environmental Compliance Consultancy (Pty) Ltd (ECC) has been engaged by Paratus Telecommunications (Pty) Ltd (hereto referred to as Paratus or the Proponent) to conduct an environmental and social impact assessment (ESIA) in accordance with the Environmental Management Act, No. 7 of 2007 and its Regulations of 2012, for which an application for an environmental clearance certificate has been submitted for the proposed construction and operation of the base transceiver station (BTS) tower and associated infrastructure on Erf 886, Lüderitz, !Karas Region, Namibia.

This document outlines the outcomes of the public engagement phase and provides records of engagements held with identified key stakeholders and interested and affected parties (I&APs). This report also provides a summary of the comments raised during the public engagement process and the environmental assessment practitioner's (EAP) responses. This report will be submitted to the competent authority (i.e. Ministry of Information, Communication and Technology (MICT)) and the Ministry of Environment, Forestry and Tourism (MEFT) as the legal custodian responsible for the administration of the ESIA process in Namibia.

1.2 PUBLIC CONSULTATION

Public consultation is a compulsory and critical element of the ESIA process as it provides a platform to engage the I&APs and enhance the scope of the impact assessment. In accordance with section 21 of the Environmental Management Act No. 7 of 2007 (EMA), the stakeholders and I&APs were engaged through various channels, which are outlined in the following sections.

1.2.1 STAKEHOLDER ENGAGEMENT AND I&APS REGISTRATION

Public consultation and registration of interested and affected parties (I&APs) commenced on 13 March 2025. Key stakeholders and I&APs were identified during the initial stakeholder mapping exercise and were subsequently engaged via email. As part of this process, they were provided with the background information document (BID) and invited to register their interest and participate in the ESIA process. Furthermore, the I&APs were encouraged to submit initial comments through various communication channels (i.e. direct telephone contact, email or via ECC's website). The formal email issued to the I&APs is provided in Appendix A.

1.2.2 SITE NOTICE

In accordance with the Section 21 (4) of the EMA Regulations, a site notice was erected on site to inform the public about the Project. A record of this notice is provided in Appendix B.

1.2.3 NEWSPAPER ADVERTISEMENTS

The newspaper adverts were published across three national newspapers (The Republikein, Namibian Sun and Allgemeine Zeitung) on 24 March 2025 and 31 March 2025, respectively. The purpose of these adverts was to initiate the public engagement process by informing the public and I&APs to register with the Project and invite them to the public meeting. The records of the newspaper advertisements are provided in Appendix C.

1.2.4 PUBLIC MEETING

The Ministry of Information, Communication Technology (MICT), in its capacity as the competent authority, formally expressed its interest in attending the public meeting and requested to be provided with the full ESIA report for review and consideration. The letter received from the MICT can be viewed in Appendix D.

The public engagement meeting was held on 01 April 2025 at St Peter's Fisherman's Anglican Church in Lüderitz. The meeting was chaired by Mr. Samuel Shinyemba – the lead practitioner for the Project. A summary of the meeting minutes is presented in Table 1, and the list of attendees is provided in Appendix E. The public meeting presentation slides are provided in Appendix F.

1.2.5 PUBLIC REVIEW PERIOD

The public review period of the draft scoping with impact assessment commenced on 11 June 2025 until 18 June 2025 (seven (7) days public review period). No comments were received from the registered I&APs.

1.3 KEY FEEDBACK ON ISSUES OF CONCERN – RESIDENTS ENGAGEMENT

The comments and concerns raised during the public meeting presented useful and valuable input in setting the scope of the environmental and social impact assessment process. From an overall review of the recorded statements, the key common themes of concern that were raised can be summarised into the following categories:

1.3.1 LOW RESIDENTS' ATTENDANCE AND ENGAGEMENT IN THE ESIA PROCESS

Representatives from the Ministry of Information, Communication and Technology (MICT) expressed concern regarding the low public turnout at the public meeting. They advised that EAPs should consider more inclusive invitation strategies to disseminate the invitations more effectively. Suggested methods include distributing pamphlets to residents, making announcements during church services, sharing short video clips across different social media platforms and collaborating with community leaders and public liaison officers (e.g. the town's Mayor). In response, the EAP acknowledged these recommendations and further clarified that the public invitation had been coordinated with the Lüderitz Town Council and the Public Relations Officer. In addition to the newspaper adverts, the Public Relations Officer at the Lüderitz Town Council was engaged to post the invitation on the council's web page.

1.3.2 VISUAL IMPACTS: ALTERED LANDSCAPE AND SENSE OF PLACE

Concerns were raised about criteria that were followed in the site selection process. The site approved by the Lüderitz Town Council for the Project already hosts an existing MTC telecommunication tower. The development is expected to further alter the landscape and aesthetic character. The EAP addressed these concerns by emphasising that the Lüderitz Town Council is mandated to oversee the town's development through its established administrative processes, which were duly followed in the site selection process. Although there are telecommunication towers in other parts of the town, the rationale for not considering alternative sites may have been to mitigate disruption to other areas, thereby opting to concentrate telecommunication towers within the same location.

1.3.3 PARTNERSHIP WITH MTC FOR SHARED TOWER INFRASTRUCTURE

The MICT official inquired whether the Proponent had initially considered collaborating with MTC to utilise their existing telecommunication tower, instead of constructing a new one. This will avoid any cumulative impacts associated with erecting an additional telecommunication tower. The EAP explained that Paratus had formally approached MTC with a request to share their tower. However, this request was denied.

1.3.4 CUMULATIVE ELECTROMAGNETIC RADIATION FROM TWO TELECOMMUNICATION TOWERS

Concerns were raised regarding the public exposure risk of cumulative electromagnetic radiation emitted by two telecommunication towers being located on the same erven. A representative from the MICT explained that assessing these impacts may be challenging, particularly as the specific tower materials and technical specifications are not yet known. In response, the EAP explained that a specialist will be appointed to conduct a comprehensive assessment of the cumulative radiation impacts. Both national and international guidelines on public protection to radiation exposure will be applied in the assessment, which would also identify receptors located within the minimum distances from the towers. Based on the findings, the assessment will then recommend the best practical management and mitigation measures to minimise the potential impacts¹.

¹ Post public meeting, a decision was made with the Proponent not to go ahead with the cumulative electromagnetic radiation assessment at this stage, unless explicitly recommended from the competent authority (i.e. MICT), the National Radiation Protection Authority (NRPA) or the Environmental Commissioner (EC) during the record of decision (RoD) process.

2 DETAILED COMMENTS AND RESPONSES

ECC acknowledges that constructive feedback from I&APs contribute to a more comprehensive ESIA. The consultation process ensures that the Project is better understood by I&APs. Additionally, I&AP feedback enhances the scope of the assessment, as it may highlight impacts that were not fully considered or included during the screening phase. The response to I&APs comments are summarised in Table 1.

Table 1 – Response to comments raised during the public engagement meeting

Stakeholder details	Question/comment	Response/clarification
Benjamin Amoomo MICT representative	Has Paratus approached MTC to collaborate on sharing their telecommunication tower infrastructure? Shared use of the same tower by multiple network operators could help mitigate potential cumulative impacts.	EAP: Yes, Paratus formally approached MTC with the request to share their infrastructure; however, this request was declined.
Fillemon Johannes MICT representative	We would like to inform all environmental consulting firms that the MICT is the competent authority and should be invited to attend all public engagement meetings.	EAP: Comment noted, thank you.
	We are generally concerned about the low level of public participation in the ESIA public meetings, a trend that the ministry has observed in other similar projects. To enhance community engagement, EAPs are encouraged to go beyond newspaper advertisements by actively engaging local leaders, distributing public meeting invitations directly to residents and utilising social media platforms and church announcements.	EAP: Comment noted, thank you. These options will be taken into consideration for future projects. For this specific Project, ECC engaged the Lüderitz Town Council to extend the invitation to all key stakeholders and requested that the public meeting notice be posted on the Council's website and social media platforms. Lorenzo Humphries: For future public meeting arrangements, the EAP should also engage the office of the Mayor. The Mayor has a broader reach within the community.
	The MICT has consistently recommended that network operators invest in 60-metre telecommunication towers, as these structures allow for infrastructure sharing. This approach	EAP: Comment noted, thank you. We will relay this information to the Proponent.

Stakeholder details	Question/comment	Response/clarification
	enables operators to collaborate and scale their operations without the need to construct additional towers.	
	We request that the Project's employment statistics also include employees of ECC, the contracted practitioner undertaking the ESIA. These figures are important for our internal records and are shared with other relevant sectors in the country.	EAP: Comment noted, thank you.
	How was the site selection process conducted? Were visual impacts taken into consideration, especially given that an existing MTC tower is already located on the same Erf?	EAP: The Lüderitz Town Council granted the lease agreement for the Project through its administrative processes. We have also noted the presence of telecommunication towers in other areas of the tower. It may be more effective for the Council to reserve this erven specifically for such developments, thereby avoiding disturbing other areas.
	We commend the EAP for the cumulative impact assessment on public exposure to electromagnetic radiation to be emitted by the two telecommunication towers. However, assessing the full impact may prove challenging if the tower materials and other technical	EAP: Comment noted, thank you. A specialist will be contracted to undertake this assessment. The tower materials and any other relevant specification will be provided by the Proponent ² .

² This point corresponds with the decision made in consultation with the Proponent post the public meeting, as referenced in the footnote on Page 8.

Stakeholder details	Question/comment	Response/clarification
	specifications are not known or the tower is not yet operational.	
	As part of the environmental clearance certificate application, the Proponent is also required to obtain consent in relation to public exposure to electromagnetic radiation from the National Radiation Protection Authority (NRPA) under the Ministry of Health and Social Services (MoHSS).	EAP: Comment noted, thank you.
	The tower materials must be weather-resistant to withstand the strong winds commonly experienced in Lüderitz.	EAP: Comment noted, thank you. We will relay this recommendation to the Proponent.
	The EAP must ensure that the public meeting attendance list is not made public on their website, in order to protect personal information and maintain confidentiality.	EAP: Comment noted, thank you.
Lorenzo Humphries Baywash Chemicals CC	What specific materials will be used in the construction of the tower?	EAP: The specific tower materials will be provided by the Proponent and will be discussed in detail in chapter 4 of the ESIA report.
	When will the construction phase commence?	EAP: The Project may not be undertaken without the issuance of the environmental clearance certificate. The ESIA and its appendices will be submitted to MICT and MEFT for a record of decision. The review period of these deliverables can typically take between three (3) and six (6) months.

Dear stakeholder or interested and affected party,

Re: The proposed construction and operation of a BTS tower and associated infrastructure for Paratus Telecommunications (Pty) Ltd on Erf 886, Lüderitz, !Karas Region, Namibia

Environmental Compliance Consultancy (Pty) Ltd (ECC) has been engaged by Paratus Telecommunications (Pty) Ltd as the independent environmental assessment practitioner to conduct an environmental and social impact assessment (ESIA) for the proposed construction and operation of the BTS tower and associated infrastructure on Erf 886, !Karas Region, Namibia.

This email intends to engage you as a stakeholder or potentially interested and affected party (I&AP) for the proposed Project and aims to establish a channel of communication with ECC for the ESIA process. The attached background information document (BID) outlines how you can interact with the ESIA process.

The BID for the Project can also be downloaded on our website via the following link:

<https://eccenvironmental.com/download/the-proposed-construction-and-operation-of-a-base-transceiver-station-bts-tower-and-associated-infrastructure-for-paratus-telecommunications-pty-ltd-on-erf-886-luderitz-karas-region-namibia/>

The invitation to the public engagement meeting will be shared in due course through the various communication channels (i.e. formal invitation letters and newspaper adverts).

ECC values community input and participation and look forward to working with you on this Project.

Should you have any questions or require additional information, please do not hesitate to contact our office at +264 81 669 7608.

On behalf of our team, thank you and kind regards,

Environmental Compliance Consultancy (ECC)

IN THE COURT OF NAMIBIA Main Division - Windhoek
Case No.: HC-MD-CIV-CT-2023/02146
In the matter between **FIRST NATIONAL BANK OF NAMIBIA LIMITED** APPLICANT and **GLENNIS VERIAPOE NANGURA KAPUJO** RESPONDENT
The undersigned, **GLENNIS NANGURA KAPUJO**, hereby make oath and say: I am a major legal adviser employed by the Applicant as Manager, Legal Collections and Recoveries - One Legal Department at First National Bank of Namibia Limited with principal place of business situated at Parkside, 3rd Floor, 130 Independence Avenue, First National Bank Head Office Building, Windhoek. I am duly authorised by the Applicant to bring this application in terms of rule 108(2)(b). The content herein is true and correct to the best of my knowledge and belief and I am not aware of any facts or circumstances which would render the content untrue or incorrect. I appear thereon and same being both true and correct, I attach hereto a copy of the certificate of authority as annexure "A". Where I make legal submissions, I do so on the advice of the Applicant's legal representatives of record, which advice I believe to be accurate. The parties are set out in the summons and particulars of claim and incorporated herein as same. The purpose of this application is to seek an order declaring the immovable property as set out in the order of motion specially executable. On or about 01 June 2021, the summons were issued by this Honourable Court in respect of a breach of a home loan agreement in the amount of N\$468,658.36. Summons were served on the Respondent on 21 July 2021 by the deputy sheriff. I refer to the return of service as filed on e-judice on 23 August 2021. The Respondent failed to enter an appearance to defend and the Applicant proceeded to apply for default judgment and same was granted on 30 August 2021. I respectfully refer this Honourable Court to the court order filed on e-judice on 31 August 2021. The relevant circumstances as contemplated in Rule 108(2)(b) of the Rules of this Honourable Court are that: 8.1 The Respondent used the monies advanced to her and acquired an immovable property forming the subject matter of this application. 8.2 The indebtedness of the Respondent is substantial. 8.3 The Respondent is in arrears with her home loan account. 8.4 Consequently to obtain default judgment, the Applicant proceeded to cause a writ to be issued by the Registrar of this Honourable Court on 30 September 2021. I refer to the writ of execution for the movable properties as issued on e-judice on 23 February 2024. The writ of execution was executed against the Respondent. However, no disposable property was pointed out, or could be found after a diligent search at the Respondent's address, as the property was vacant. I respectfully refer this Honourable Court to the copies of the writ of execution and Nula Bona return issued by the deputy sheriff attached hereto and marked as "GAVT" and "GAVT" 2. By virtue of the foregoing no other reasonable means exist in which the Applicant can recover the outstanding balance and the Applicant will be seriously prejudiced if this application declaring the property executable is not granted. 10. The Applicant has a substantive right to execute against the immovable property hypothecated by virtue of the Bond executed in its favour, the continuous covering mortgage bond as attached to the particulars of claim marked as annexure "D". On 4 March 2023, I further submit that the property in question is not the primary residence

Republikein
Legal Notices

of the First and Second Respondent. The Applicant has complied with Rule 108(1), 108(2), 108(3) and rule 108 (4)(3). The Applicant humbly prays that the order as prayed for in the attached Notice of Motion be granted. **GLENNIS NANGURA KAPUJO** I hereby certify that the Deponent has acknowledged that he knows and understands the contents of this declaration; that he does not have any objection to taking the prescribed oath and that he considers same to be binding on his conscience. I have thereafter administered the oath by causing the Deponent to utter the following words: "I swear that the contents of this declaration are true, so help me God", whereafter the Deponent signed this declaration in my presence and in the presence of the undersigned on the 21st day of MARCH 2025. I there after signed this certificate and this is true and the same place in the presence of the Deponent. In administering the oath, I complied with the regulations contained in the Government Notice No. 5, R1258, R1648 and R1648 dated 21 July 1972, 19 August 1977 and 11 July 1980 respectively. BEFORE ME, **CO-MAGISTRATE OF OATHS** FULL NAMES: **CAPACITY ADDRESS:** **DATE:** **TIME:** **PLACE:**

COMPANY NEWS IN BRIEF

MULTICHOICE WARNS SHAREHOLDERS OF FINANCIAL DIFFICULTIES
SA's biggest pay-TV operator Multichoice, which also owns Showmax, warned shareholders that it continues to feel strain given pressure by the ongoing cost-of-living crisis, compounded by elevated inflation and interest rates in many of its markets. This is likely to impact negatively on performance in the year to end March. The group has returned to a positive equity position, but capital preservation remains a key consideration in the current environment, it said, adding that shareholders should be cautious regarding their dividend expectations. **-FIN24**

PLATZ AM MEER UP FOR SALE
Safari Investments, which owns a R4.2-billion portfolio of eight retail centres in SA and Namibia, announced a R290-million (R290-million), with earn-out considerations, deal to sell its Namibian business, or the Platz am Meer Shopping Centre, a waterfront shopping centre in Swakopmund. This forms part of the group's strategy to exit the Namibian market and focus on rural and township areas of SA. The buyer is Namibia-listed Oryx Properties. **-FIN24**

CAPITEC FOUNDER GERRIE FOURIE SET TO RETIRE
SA's biggest digital banker, Capitec, announced on Friday that founding member and CEO Gerrie Fourie is set to retire at the group's upcoming AGM on 18 July. Fourie (61) has overseen the rapid rise of a bank, which has transformed from a challenger bank serving 5 million in 2014, when he was appointed as chief executive, to over 24 million. The group also announced that it has appointed Graham Lee (50), who has been a member of the group executive team since 2022. Lee joined Capitec in 2003 and has held numerous strategic positions in credit, technology and data, retail operations, and most recently, as group executive of the retail bank division. He started his career in investment banking in Zimbabwe in 1997 before continuing in London with Morgan Stanley International. His career outside of Capitec includes financial software development and data analytics in Australia and leading a micro-finance bank in Nigeria. He also lectured part-time for the MBA programme of the University of Stellenbosch Business School.

TELKOM ANTICIPATES 10% PROFIT HIKE
SA's third-largest mobile operator, Telkom, said on Friday headline earnings are expected to rise by at least 10% in its year to end March from 376c, while basic earnings, which include one-off items, are expected to surge by at least 300% from 385.5c. Telkom, which booked a profit of almost R1.9 billion in its 2024 year, closed out the sale of Swiftnet on 27 March. It first announced the sale of announced the sale of approximately 4 000 towers and masts early in 2024, a move which comes as it looks to focus on its core operations. The group is currently pushing a new digital strategy with "infrastructure at its core", and has said previously it sees a competitive advantage in its fibre and data offerings. It didn't go into details in its initial trading statement on Friday. I had said in February it had a strong third quarter, which saw a jump in its mobile subscribers by over a fifth to about 24 million - outperforming the local market.

UBISOFT TO CREATE SUBSIDIARY
In a bid to escape financial woes, French games giant Ubisoft said Thursday it was creating a new subsidiary around its most popular franchises such as "Assassin's Creed" in partnership with China's Tencent. The new unit, valued at around \$4 billion (R78 billion), will be 25% controlled by Tencent, which will stump up €1.16 billion of new investment in exchange. Alongside "Assassin's Creed", the subsidiary will bring together "Far Cry" and "Tom Clancy's Rainbow Six" - among the most popular long-running names in Ubisoft's roster of game universes. Ubisoft appears to be making the most of last week's successful launch of the latest "Assassin's Creed" instalment, "Shadows", on which much of its future was riding. Conditions for the Tencent deal include a bar on the French company losing its majority in the subsidiary for its first two years. Tencent cannot increase its stake for the next five years - unless Ubisoft loses its majority in the meantime. **-AFP**

SMIC BEING PROBED BY TAIWANESE AUTHORITIES
Taiwan said Friday it was probing Chinese chip titan Semiconductor Manufacturing International Corp (SMIC) and other companies amid claims they illegally poached some of the island's top engineers. Officials searched 34 locations and questioned 90 people this month as part of an investigation into 11 Chinese firms, Taiwan's Investigation Bureau said. "The high-tech industry is the lifeblood of our country's economy, and companies with semiconductor technology and related industrial chains maintain our economic strength," the bureau said in a statement. "Talents in related industries have therefore become the targets of poaching by Chinese firms." Shanghai-based SMIC was suspected of "illegal acts" in northern Hainan, home to an industrial park dubbed Taiwan's Silicon Valley, the bureau said. "The company used a Samsan business as a cover to come to Taiwan to set up a branch (or branches) and poached talents under the guise of an 'overseas Chinese and foreign investor'," the bureau added without providing further details. Investigators were also looking into other chip firms including Shenzhen Torey Microelectronics Technology Co. and Clounix. **-AFP**

Mr. Stephan Bezuidenhout,
Principal Environmental Practitioner,
Environmental Compliance Consultancy (Pty) Ltd,
PO Box 91193,
WINDHOEK.

Dear Mr. Bezuidenhout,

**ENVIRONMENTAL SCOPING ASSESSMENT (ESA) FOR THE PROPOSED
CONSTRUCTIONS AND OPERATION OF A BASE TRANSCIVERS STATION TOWERS
AND ASSOCIATED INFRASTRUCTURE AT LUDERITZ, //KHARAS REGION**

Your letter dated 21 February on the above-mentioned subject matter refers.

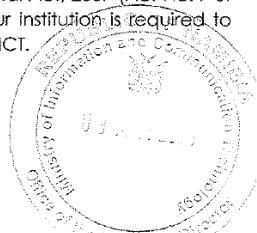

The Ministry of Information and Communication Technology (MICT), requests the Environmental Compliance Consultancy (Pty) Ltd to submit the following documents to our office for review, prior to submission to the Environmental Commissioner:

- Scoping Reports;
- Meeting minutes with the affected parties;
- Signed attendance register from the public consultations; and
- Environment Management Plans (EMP) for proposed projects.

This is to ensure compliance with the Environmental Act, 2007 (Act No. 7 Of 2007) and its regulations. For ease of planning, your institution is required to share the schedules of consultative meetings with MICT.

Sincerely,

Audina Mathe
EXECUTIVE DIRECTOR

All official correspondence must be addressed to the Executive Director.

APPENDIX F – PUBLIC MEETING PRESENTATION

Paratus Telecommunications (Pty) Ltd – The proposed construction and operation of a base transceiver station (BTS) tower and associated infrastructure on Erf 886, Lüderitz, !Karas Region

ESIA - Scoping phase

01 April 2025

Welcome

Agenda

- Public meeting objectives
- Environmental assessment practitioner (EAP) (i.e. ECC)
- Paratus Telecommunications (Pty) Ltd (the Proponent)
- Project background information
- Environmental and social impact assessment (ESIA) process
- Public participation process
- Questions/discussion

Public meeting objectives

- To inform the public and provide information detailing the proposed construction and operation of a base transceiver station (BTS) tower and associated infrastructure (the Project).
- Provide an overview of the environmental and social impact assessment (ESIA) process.
- To record all **public concerns, questions and comments** to incorporate them into the environmental assessment process.
- To establish a channel for ongoing consultation.

Environmental assessment practitioner (EAP)

- The appointed EAP - Environmental Compliance Consultancy (Pty) Ltd (ECC).
- Multidisciplinary environmental consulting firm – Agriculture, forestry, energy, mining and tourism sectors.
- Independent, objective and unbiased.
- Evidence and risk-based approach.
- Local stakeholders, specialists' knowledge and expertise to guide the ESIA process.
- Request active stakeholders and public participation throughout the ESIA process.

5

Paratus Telecommunications (Pty) Ltd (Proponent)

- Paratus is a telecommunication company based in Southern Africa (network footprint in Angola, DRC, Mozambique, Namibia, South Africa and Zambia).
- **Vision statement:** a transformed Africa through exceptional digital infrastructure and customer service.
- **Mission statement:** connect the world to Africa through locally owned infrastructure.
- Paratus provides reliable ICT network solutions, fiber and satellite connectivity to enable seamless internet access and network services to businesses and individuals.

6

Project background information

- ECC has been engaged by Paratus Telecommunications (Pty) Ltd (Proponent) as the independent EAP to undertake the ESIA study for the Project in terms of the Environmental Management Act, No. 7 of 2007 and its 2012 Regulations.
- The Proponent proposes to construct and operate a 30 m BTS tower (lattice tower), along with associated infrastructure on Erf 886, Lüderitz.
- Land use approval (land lease agreement) for the Project has been granted by the Lüderitz Town Council.

7

- The Project site is located within a well-established residential and recreational space, characterised by a mix of residential properties, schools, retail shops and healthcare facilities.
- There is already an existing MTC tower on the Erf.
- The two towers will operate under different frequency licence bands.

8

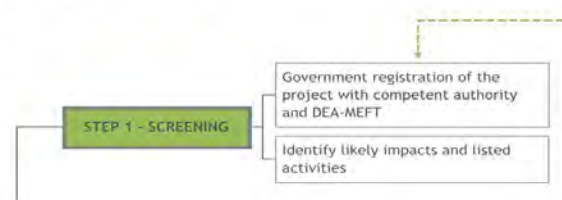

Project site

ESIA Process

Step 1 - Screening phase - *complete*

- DEAF portal (APP - 005413)

ECC Application triggers

ACTIVITIES THAT TRIGGERED AN ENVIRONMENTAL CLEARANCE CERTIFICATE APPLICATION	ESIA SCREENING FINDINGS
INFRASTRUCTURE (10.1) The construction of: (g) Communication networks including towers, telecommunication lines and cables. (j) Masts of any material or type and of any height, including those for telecommunication, broadcasting and radio transmission.	• A BTS tower and associated infrastructure will be constructed on the Erf.

ESIA Process

Step 2 - Scoping phase - *current phase*

Public participation and meeting

- Notification of the Project – newspapers, site notice, and consultation with key stakeholders and interested and affected parties (I&APs).
- Background information document (BID): provides I&APs with information about the Project and how to engage with the ESIA process.
 - BID is available on ECC's website.
- Public & stakeholder consultation meeting:
 - Tonight's presentation highlights information from the BID.
 - Present the Project to the public.
 - I&APs can ask questions directly to the EAP.

13

Baseline and specialist studies

BASLINE SPECIALIST STUDIES

Baseline information – reference existing literature and publicly available reports

Specialist study – cumulative impacts of public and workers exposure to radiation from the two telecommunication towers.

14

ESIA process

Step 3 : Assessment phase – future phase

- **Assessment and evaluation:**
 - Predict and quantify impacts
 - Evaluate alternatives
 - Assign mitigation measures
 - Develop monitoring measures

4 Draft the ESIA report and ESMP

- Public review – 7 days.

5. Submit final report to competent Authority (MICT) and MEFT.

6. Receive record of decision (RoD).

15

Potential impacts to be assessed

Potential Project impacts include (but are not limited to):

- Visual impacts.
- Electromagnetic radiation (*cumulative*).
- Potential disturbance to heritage objects or resources (sub-surface).
- Impacts on avifauna.
- Network coverage and improved internet services.
- Competition with other local network service operators.
- Economic growth and job creation (temporary employment).

16

Environmental and social management plan (ESMP)

- Details mitigation measures and develop monitoring plans to ensure the potential impacts are minimised and mitigated throughout the proposed scope of work (Project lifespan).

17

Please Remember to Register as an I&AP

How to register?

- Via the ECC website, under "Projects":
