RE – STAKEHOLDERS ENGAGEMENT MEETING INVITATION REGARDING MIING OPERATIONS AT UIS TIN MINE MINING LICENCE 129 (ML 129) AND MINING LICENCE 133 (ML 133), UIS IN THE ERONGO REGION, NAMIBIA.

Dear Chief Zacharias Seibeb,

Environmental Compliance Consultancy (Pty) Ltd (ECC) is the contracted environmental assessment practitioner (EAP) for both mining licence 129 (ML 129) and mining licence 133 (ML 133), currently held by Uis Tin Mining Company (UTMC); a subsidiary of Adrada Mining Company (formerly AfriTin). The environmental clearance certificates for both mining licences are in place.

ECC acknowledge authority vested in you as the Paramount Chief of the Dâure Daman Traditional Authority. On behalf of UTMC, ECC propose to engage traditional authority leaders in the regional town of Uis regarding mining operations at both ML 129 and ML 133. ECC cordially invites your esteemed office, the leadership council under your stewardship command and the regional governing authorities to the focus group meeting scheduled as follows:

Date: Wednesday, 09th August 2023

Time: 12H00

Venue: Uis Community Hall

Meeting agenda:

Environmental clearance certificates are in place for both mining licences, therefore the envisioned meeting serves as additional stakeholder engagement initiative to ensure inputs and concerns from the Dâure Daman Traditional Authority and regional council hierarchy are fully captured. Any environmental and social inputs thereon raised will be crucial in the improvement of the impact assessment and environmental studies underway for the mining licences areas.

Location of ML 129 and ML 133:

Both Mining licences are located in the the Daures Constituency in the Erongo Region. ML 129 covers an area of approximately 4868 hectares and is located on the Uis- Henties Bay C35 district road, approximately 15 km southwest of the Uis town, whilst ML 133 covers an area of approximately 3288 hectares and is located along the banks of the ephemeral Omaruru River, approximately 45 km south of the Uis town, in the Nai Nais community. For reference, the locality maps for ML 129 and ML 133 are presented as appendix A and B.

ECC values community inputs into our projects and we look forward to formally engage with you and the regional and local leadership of Uis during this envisioned forum. We further envision a positive, transparent, and continuous channel of communication in our future project.

Should you have any questions or require additional information please do not hesitate to contact our office, and a team member will gladly assist you.

Yours sincerely,
